PCFitment Pricing

Question & Answer Test Set for Chatbot Validation

Source: https://pcfitment.com/Pricing
Prepared: October 11, 2026
Purpose: Test whether a chatbot can answer plan-comparison, feature, fee, restriction, and service-pricing questions using the PCFitment Pricing page.

How to use this document

Ask each question exactly as written, then compare the chatbot response with the answer. The questions include direct lookups and scenario-based questions. Answers are limited to what the Pricing page states; when the page does not provide a fixed quote, the expected answer says to contact PCFitment or use Get Pricing.

Suggested chatbot scoring: award credit for exact listed plan prices/capacities, identifying which fees are add-ons, stating the 50-part-number daily OE/eBay download limit and PST reset, distinguishing backup-only Excel downloads from marketplace submission files, and refusing to invent prices where the page says Get Pricing.

Vehicle Fitment Plan Snapshot

Plan	Monthly price	SKU allowance	Brands / universal fitments
Startup	$15	Up to 150	1 brand or limited universal fitments
Tiered 1	$25	500	3 brands or limited universal fitments
Tiered 2	$50	1,000	6 brands or universal fitments
Pro	$150	3,000	20 brands or universal fitments

Important: additional SKU charges, compatibility submission, YMM setup/renewal, and ACES export conditions are described separately below; do not assume every add-on is included in the base plan price.

Question & Answer Bank

Use these pairs to evaluate retrieval accuracy and answer completeness.

Q01. What is the length of PCFitment's free trial, and is a credit card required?

Expected answer: The Pricing page advertises a **14-day free trial** and says **no credit card is required**.

Q02. How much does the Startup Plan cost, and what capacity does it include?

Expected answer: The Startup Plan is **$15 per month**. It includes up to **150 SKUs** and **1 brand or limited universal fitments**. Listed features include the Fitment Tool, Fitment Validation, Help & Email Support, a Vehicle Research Tool, and Year/Make/Model (YMM) search integration for BigCommerce, Shopify, and WooCommerce subject to additional setup and monthly renewal fees.

Q03. What is included in Tiered 1, and what is its monthly price?

Expected answer: Tiered 1 costs **$25 per month** and includes all Startup features. It lists **500 SKUs**, **3 brands or limited universal fitments**, Walmart marketplace submission, limited downloads, OE search with a limited-download label, full Excel download for backup purposes, and ACES Excel/XML download subject to additional setup fees and terms. Compatibility submission is listed separately at **$10/month for 500 items**, plus $10 for each additional 500 items.

Q04. What is the extra SKU charge shown for Tiered 1?

Expected answer: The page lists **$25 for every additional 500 SKUs** beyond the Tiered 1 allowance.

Q05. What is included in Tiered 2, and how does it compare with Tiered 1?

Expected answer: Tiered 2 costs **$50 per month** and includes all Tiered 1 features. It raises capacity to **1,000 SKUs** and lists **6 brands or universal fitments**. The page lists an additional **$25 for every additional 500 SKUs**.

Q06. What does the Pro Plan cost, and what does it add?

Expected answer: The Pro Plan costs **$150 per month** and includes Tiered 2 features. It lists **3,000 SKUs**, **20 brands or universal fitments**, and YMM search integration for BigCommerce, Shopify, and WooCommerce. The YMM integration still has an additional setup fee.

Q07. How much does it cost to add more SKUs to Tiered 2 or Pro?

Expected answer: The pricing page lists **$25 for every additional 500 SKUs** for both Tiered 2 and Pro.

Q08. Which plans list Walmart marketplace submission?

Expected answer: Walmart marketplace submission is explicitly listed under **Tiered 1**. Since Tiered 2 and Pro include the preceding tier's features, those plans include Tiered 1 features as described on the page.

Q09. Is compatibility submission included in the Tiered 1 base price?

Expected answer: The page lists compatibility submission separately at **$10 per month for 500 items**, with **$10 for each additional 500 items**. Treat this as an add-on rather than assuming it is included in the $25 plan price.

Q10. What is the daily limit for limited downloads from OE/eBay?

Expected answer: A user can download a maximum of **50 part numbers per day** from OE/eBay. The limit is based on **Pacific Standard Time (PST)** and resets each day.

Q11. What should a customer do if they need a large amount of data converted?

Expected answer: The Pricing page says to **contact PCFitment** if a large amount of data needs to be converted.

Q12. Can the Full Excel Download be used to submit fitment data to another marketplace?

Expected answer: No. The page says the Full Excel Download is for **backup purposes only**, not for submitting data to other platforms. It also says this feature cannot be used by universal users, collections, or parts.

Q13. What is required to export ACES XML?

Expected answer: The page states that an **AutoCare subscription code** is required to export data in ACES XML format. ACES Excel/XML download is also marked as subject to additional setup fees and terms and conditions.

Q14. Is ACES XML export available for other platforms, and what should the customer do?

Expected answer: The page says to **contact PCFitment** if ACES XML is needed for other platforms.

Q15. How are YMM plugin setup and renewal fees handled on plans below Pro?

Expected answer: For plans below Pro, the page says a one-time setup fee depends on the theme and integration complexity, and a **$49/month YMM plugin renewal fee** is added to the existing subscription plan.

Q16. How are YMM plugin fees handled on the Pro Plan or above?

Expected answer: A one-time setup fee still applies based on theme and integration complexity. The page says there is **no additional monthly YMM plugin renewal fee** for Pro or any plan above Pro.

Q17. Does the Pricing page show fixed prices for eCatalog, PIM, PDF Catalog, and fitment data creation services?

Expected answer: No fixed prices are shown for these listed service categories on the page. They display a **Get Pricing** option, so customers should request a quote rather than infer a price from the monthly vehicle-fitment plans.

Q18. Which YMM/VIN integrations are listed on the Pricing page?

Expected answer: The page lists **BigCommerce YMM Integration, WooCommerce YMM Integration, Shopify YMM Integration, Magento YMM Integration, and VIN Search Integration**. Each has a Get Pricing option.

Q19. Which automotive business growth services are listed?

Expected answer: The page lists **Automotive eCommerce Development, SEO & Digital Marketing Services, Amazon Brand Store Creation, Amazon Listing Optimization, Amazon PPC Management, and A+ Content Design**. The listed services direct customers to Get Pricing.

Q20. A shop manages 800 SKUs and 5 brands. Which published plan capacity should it compare first?

Expected answer: Tiered 2 lists capacity for **1,000 SKUs and 6 brands or universal fitments at $50 per month**, so it is a logical plan to compare first. Confirm the exact fitment/brand arrangement and any add-ons with PCFitment before purchase.

Q21. A customer has the Pro Plan and wants YMM integration on Shopify. Is the integration completely free?

Expected answer: No. The Pro Plan lists YMM integration with an **additional one-time setup fee**. The page says Pro or above does not pay the additional monthly YMM plugin renewal fee, but that does not remove the setup fee.

Q22. Does the Pricing page provide a fixed price for custom automotive eCommerce development?

Expected answer: No fixed amount is shown for Automotive eCommerce Development. The page describes the service and provides a **Get Pricing** route to request a quote.

Official source and verification notes

Primary source: PCFitment Pricing. Plan prices and inclusions may change. The PDF reflects the content available on the source page when prepared. For custom services, the page generally directs customers to Get Pricing rather than publishing a fixed fee.
